Convener

DR. NAGESWARA RAO AMANCHI

Department of Zoology

Nizam College, Hyderabad.

Co-Convener

Dr. A. SRINIVAS

Department Of Genetics

Osmania University, Hyderabad.

ABOUT THE CONFERENCE

India has rich tradition of medicinal wisdom. 60-70% of rural Indian people are depended on traditional or ethnomedicine. Indian systems of medicine such as Ayurveda, Siddha, Unani, Homoeopathy, Yoga, and Naturopathy have become a part of the culture and traditions. India with its strong base in traditional knowledge on herbal medicine and vast plant biodiversity has a great potential. In this current scenario, an urgent attention is needed to document the available potential medicinal plants in different parts of our country. Sustainable exploitation of medicinal resources can provide multiple benefits to biodiversity, livelihoods and human health, in particular, relating to their affordability, accessibility and cultural acceptability. Biodiversity is an irreplaceable source for discovery of new medicines from ancient times and even in modern times, in the preparation of curative, protective and preventive medicine. Biodiversity and ecosystem services offers significant opportunities to more consistently recognize and manage biodiversity services for human health and to contribute to conservation and sustainable use at all scales. We can improve our understanding of the complex linkages between biodiversity, ecosystem services and human health by strengthening collaboration with the health sector and better integrating into national biodiversity and health strategies. The implementation of such strategies could be a joint responsibility of stake holders and policy makers.

ABOUT THE UNIVERSITY

Osmania University, established in 1918, is the seventh oldest in India, the third oldest in south India and the first to be established in the erstwhile princely state of Hyderabad. Through out its existence of over ten decades, it has shown remarkable progress and sustained an integrated development of all faculties. It has significantly contributed to the academic and economic development of not only the region but also of the Country. Marking centenary year, the university authority aim to make Osmania University a world class institution and focus our strengths towards rebuilding and restoring the glory of the university.

ABOUT THE COLLEGE

Nizam college is an autonomous, constituent college of Osmania University. It was established in 1887 and it is one of the premier colleges within the fold of Osmania University. Nizam College celebrated its centenary in 1987. The college is one of the oldest and most prestigious institutions of higher education not only in Telangana State but also in India.

ABOUT THE DEPARTMENT

The Department of Botany was launched in the year 1956 with graduation and became a postgraduate centre in 1980. This Department has been recognized as a research center providing facilities for research in Taxonomy and Applied Palynology. The dynamic and visionary contributions of several teachers earned the Department national recognition for its teaching and research.
