### Energy Audit:

The determination of energy requirements of an institution is very crucial step to know about the power usage and power requirements. It helps us to understand how much power is being used, which appliances are drawing more power, identify power wastage, how much revenue is spent in form of electricity bills, how much power can be saved through energy efficient systems. One can also estimate total power used and total power saved. Energy audit suggests efficient means to Save Power, “Power saved is Power Generated” and reduce carbon emission i.e., pollution free energy.

ECC, Nizam College organised an energy audit for Nizam College campus in collaboration with SUNTEK ENERGY SYSTEMS PVT LTD, Hyderabad. The site visit was done by Technical Engineers who conducted energy audit and submitted the report in connection with the requirement of Solar on Grid PV Power Plant for College. As per the site inputs it was recommend to install 111KW Solar on Grid PV Power Plant.
